THE PERFECT SHAPE FOR YOUR FACE

WHAT IS THREADING?

Threading is the gentle practice of shaping eyebrows using a cotton thread and a deft hand. It is the most precise method for facial hair removal, and removes any unwanted hair from the root without peeling or causing irritation to skin.

It is a great way of defining, and enhancing your facial features and leaves longer lasting results with slower and finer hair re-growth. As it is one of the safest techniques for hair removal, it also does not damage the skin's natural elasticity.

It has been said, "Once you thread, you never go back to other methods of hair removal." Achieving a shape that flatters and enhances your features can quickly and painlessly alter your appearance.

The key is getting the PERFECT shape for YOUR face.

WHY COME TO KULLY'S UPPER ECHELON?

Nowadays threading is considered the "must-have" beauty treatment, and although many people can thread, having the eye and the experience to know what will suit each face, is what separates amateurs from professionals.

Kully prides herself on being the best at what she does, so her clients look the very best they can be. She is very much the artiste when it comes to eyebrow shaping and perfection, which is apparent from the way in which she performs treatments, and creates bespoke shapes for her clients.

By offering the highest standards of treatment, we will give your eyebrows the definition you're looking for, and much more, in as little as 15 minutes.
